Amendments to the Specification:

Please replace the Abstract on page 25 with the following Abstract as amended.

Abstract

A composite construction, such as a boat hull, eomprisinguses a thermoplastic layer and a fiberglass reinforcement composite. The thermoplastic layer eomprises has an acrylic film having a thickness of 0.5 to 1.5 mm and an ABS layer having a thickness of 0.5 to 15 mm. The reinforcement may also include cured polyurethane foam stringers or logs to provide additional rigidity and strength to the construction.
